

Niranjan Charty

Java Full Stack Developer | Spring Boot & Microservices | AWS & Kubernetes | GenAI & RAG Pipelines
Hyderabad, Telangana | +91 9583172160 | niranjanacharty2013@gmail.com | linkedin.com/in/niranjana-charty-88922a104 | github.com/ChNira2024

PROFESSIONAL SUMMARY

Java Full Stack Developer with 2.9 years of hands-on experience engineering cloud-native microservices, RESTful APIs, and AI-powered solutions. Achieved 30% improvement in API response time via Redis caching and accelerated frontend delivery through reusable React.js component libraries. Formulated end-to-end RAG pipelines integrating Spring AI, Ollama, and vector databases, delivering intelligent document search over organizational knowledge repositories. Proficient in designing and deploying scalable systems on AWS, Kubernetes (EKS), and CI/CD automation. Contributing to Agile/Scrum environments, ensuring consistent on-time sprint delivery. Available for immediate joining — open to Full Stack, Backend, and GenAI engineering roles.

TECHNICAL SKILLS

Java Ecosystem	Java (8–21), Spring Boot, Spring MVC, Spring Security (JWT/OAuth2), Spring Data JPA, Microservices, Kafka, REST API, Multi-threading
AI & GenAI	Spring AI, RAG Pipelines, Vector DBs (MariaDB Vector), Ollama, OpenAI API, Embedding Generation
Cloud & DevOps	AWS (EC2, S3, RDS, Lambda, EKS), Docker, Kubernetes, Terraform, ArgoCD, Jenkins, GitHub Actions, CI/CD
Frontend	React.js, Angular, TypeScript, JavaScript (ES6+), HTML5, CSS3
Databases & Cache	PostgreSQL, MySQL, Oracle, MariaDB (Vector), Redis (Caching & Pub/Sub)
Testing & Tools	JUnit5, Mockito, SonarQube, Postman, Swagger/OpenAPI, Maven, Git, Jira, Prometheus, Grafana, EFK Stack, Keycloak

PROFESSIONAL EXPERIENCE

Software Engineer Eidiko Systems Integrators	Hyderabad, India Jan 2022 – Oct 2024 (2.9 years)
- Architected RESTful microservices using Spring Boot, enabling independent service scaling, reducing deployment time by 40% - Accelerated API performance by 30% implementing Redis caching, reducing database load significantly - Automated document extraction by integrating Spring AI and Ollama, saving 15+ hours of manual effort weekly - Expedited release cycles by 35% implementing CI/CD pipelines using Jenkins and GitHub Actions for AWS/Kubernetes - Streamlined UI development effort by 20% producing reusable React.js component libraries across modules - Established secure role-based access control using Spring Security with JWT and OAuth2, eliminating unauthorized access - Participated in Agile/Scrum sprints — contributing to planning, code reviews, and on-time delivery	

Key Projects:

1. Owner's Association (OA) — Mashreq Bank
 - Integrated secure payment gateway with UAE government APIs (Mollak), achieving real-time transaction validation and reducing payment failures by 40%
 - Reorganized transaction processing workflows, improving system reliability and reducing bottlenecks by 30%
 - Engineered RESTful APIs for concurrent banking transactions with robust error handling, ensuring 99.9% transaction success rate
2. Court Case Management System (CCMS) — Government Legal Entity
 - Developed case lifecycle management using BPM workflows, reducing case processing time by 35%
 - Improved document retrieval efficiency by 50% through indexed search and metadata management
 - Implemented RBAC for multi-user legal teams with audit trail logging, ensuring 100% data security compliance

TECHNICAL PROJECTS

RAG-Based Intelligent Assistant Java, Spring AI, Ollama, Docker, MariaDB Vector
- Designed end-to-end RAG pipeline for semantic search over enterprise document repositories, improving retrieval accuracy by 40% - Integrated vector database (MariaDB Vector) for similarity search, enabling context-aware document retrieval with 60% faster results - Built REST APIs for document ingestion, embedding and LLM-powered query processing using Spring AI and Ollama - Optimized retrieval latency using vector indexing strategies, reducing query response time by 45% - Containerized entire application with Docker, reducing environment setup time by 60%

EDUCATION

Master in Computer Application (MCA)
Gandhi Institute for Technological Advancement (GITA), Bhubaneswar | Graduated: 2020 (77%)
